

Policy for Student Eligibility for the Massachusetts State Science & Engineering Fair

Students are eligible for participation in the Massachusetts State Science & Engineering Fair (MSSEF) and Affiliated Regional Fairs based on their enrollment in a Massachusetts High School regardless of their state of residency.

Students from a Massachusetts High School are eligible for competition in MSSEF either by direct entry from their enrolled high school or by participation in their school's Regional Fair. Upon entry in MSSEF or a MSSEF affiliated fair, the student agrees not to participate in a science fair competition in another state or country, within the same year, in accordance with the MSSEF Ethics Statement.
