

# Meet with Zeke

## MSEF Alum

### Field Research and Conservation Professional

As a student, Greenfield resident Ezekiel 'Zeke' Jakub was introduced to the Massachusetts Science & Engineering Fair. With the help of teachers and mentors, he entered and won high honors at the statewide and international science competition with his project focusing on avian bioacoustics of the Eastern American Crow (C.b.b.). Still pursuing this work today, Zeke is now the Executive Director at an international scientific research, conservation action and STEM education non-profit in the Republic of Panama called Conservacion Panama Inc (CP).

As a field scientist, he has amazing stories and inspiring experiences. Zeke owes much of his success to his participation in the science fair pathway. He says: **“The doors that were opened were numerous and awesome!”**

Zeke is in Western Mass through October 2024 and would like to support your students. Programs are in English and/or Spanish.

- Meet and greet about his work
- Hands-on practice with field science skills
- Promote his upcoming programs with Mass DCR to interested students.
