MSEF

Massachusetts Science + Engineering Fair

Ever wondered...

- What makes super balls bouncy?
- If "green" products are really eco-friendly?
- How to sink a basket or kick the perfect field goal?

Design an experiment and present your discoveries!

Middle School Science & Engineering Fair projects give YOU a chance to

be curious and playful in STEM,
find solutions to problems,
learn more about the world around you,
and the opportunity to **win prizes and awards!**

"You *might* win something, but you will definitely learn something."
-2023 Middle School State Fair participant

What does it take?

- Projects should solve a problem or answer a question through research or design
- Projects are made up of 1-3 students
- Most projects are sponsored by a teacher, but out of school programs are eligible
- Participate at the fair in your region and/or the state fair
- Judges aren't looking for the fanciest project, but ones that are well designed and executed

Science Research   **Engineering Design**   **Computer Science**   **Mathematics**
